

Easily access AQUAWatch app from your smartphone

You have created an account on our web application and now want to be able to access it easily from your phone? It is very simple to add an icon to your phone in order to access it in one click. We explain here how to do it in three clicks.

Android & IOS

Google Chrome

- Open your Google Chrome app
- Go to the address of the web application. The web application is generally found on app.aquawatch.fullup.be
- Select the options to the right of the URL bar (push on the three small dots); select "add to homepage" and add the shortcut to your phone home page
- Quit your internet browser. The icon is now on your phone home screen

With the basic Android web browser

If you don't have Google Chrome, you can also do a similar procedure by going to the default internet browser.

- Open the internet application of your smartphone
- Go to the address of the web application. The web application is generally found on app.aquawatch.fullup.be
- Select the options at the bottom of the menu bar. Select "Add page to" then indicate "Home Screen" and select "Add"
- Quit your internet browser. The icon is now on your phone home screen

With another browser

This article should help you add an icon to your Android screen regardless of the browser you have installed.
